FOREWORD

All the Five-Year Plans emphasized quantitative expansion in education at all levels. To this end school facilities have expanded considerably throughout the country. Although norms have been laid down by the State authorities regarding school buildings and other aspects before according recognition, it is observed that there are still a large number of schools, particularly in rural areas, which are run in thatched huts, tents or even in open space.

□ In the Third All-India Educational Survey, an attempt has been made to study various aspects of school buildings at the different stages of school education. These include the condition of school buildings (pucka, kuchcha, partly pucka, thatched huts, tents, open space), ownership (including adequacy and the original purpose for which they were constructed), area of school campus for instructional and non-instructional purposes, shortage of rooms and expansion potential, area for farming/agriculture and work experience, availability of playground facility and its area and hostel facilities and the number of inmates.

□ Information on each of the above aspects is discussed in the report for each stage of school education with the main accent on institutions in rural and urban areas and those under various managements.

□ I am thankful to Shri S.G. Bhaskulikar and Shri S.C. Mittal of the Survey and Data Processing Unit who are responsible for bringing out this report.

□ It is hoped that this report will be found useful by educational planners, administrators as well as all others concerned with education.

Introduction

The quantitative expansion in the field of education in India during the last quarter of this century has been phenomenal. This has however not been followed up by augmentation of physical facilities needed to attract and retain children of the earlier school-going age in the schools nor has it created an academic atmosphere among the higher school-going students through better libraries, well-equipped laboratories, or teaching aids. This is not only true of this country but also, to a large extent of all countries in Asia. While reviewing the Educational Building and Facilities in the Asian Region the observations of UNESCO in a recent study are very pertinent. "In a recorded history of education that has no parallel in any other part of the world, there is scant reference to school buildings, for much of Asia has a benevolent climate which enabled the single teachers and their students to work outdoors or under a lightweight shelter."¹ Probably the condition of school buildings in our country cannot be expressed in more appropriate terms. The above comments have particular reference to schools in rural areas which are mostly single-teacher schools. As 80% of our population is rural much of the expansion, particularly in earlier stages of education, has taken place in rural areas and hence this accounts for poor condition of school buildings in these areas compared to those in the urban ones. Disparities in the condition of school buildings between the rural and the urban buildings have been focussed in the above journal in the following words: "Educational efforts were concentrated in the urban areas and hence the school buildings were better in urban areas than the rural ones and all but a few in rural areas remained

substantially without extensive formal educational services." The researches conducted by this agency viz. UNESCO during the last several years and published through 'occasional series' deal more with designs and specifications of the school buildings in general and special rooms like subject rooms, subject laboratories as also libraries in particular which are indeed a distant vision for the developing countries for decades to come. Even the Central Building Research Institute, Roorkee, has prepared some concrete proposals for low-cost school buildings which the country is not in a position to implement extensively due to limited resources. Keeping these points in view it is worthwhile to examine the position of school buildings in the country from the data available in the Third All-India Educational Survey.

Earlier two educational surveys were conducted, the first in 1957 and the second in 1965. The scope of the First Survey was limited mainly to identify rural habitations with and without schooling facilities and plan the location of future schools. Hence much could not have been expected of this survey for probing into the condition of school buildings restricting it to the number of rooms with their floor area and find out the per pupil area available in the schools. Although the scope of the Second Survey was much wider than the First Survey, nevertheless here it was limited to an attempt to inquire just the condition of the school buildings, number of rooms with the floor area and playground facilities. However, the findings of both these surveys were highly revealing.

With the widened scope, objectives and contents of the Third Educational Survey, a wider scope was available to know more about the school buildings also. The survey being on the lines of census could

1. Bulletin of the UNESCO Regional Office for Education in Asia, No. 17, June, 1976.

not have probed in depth the quality of the school buildings nor the sophistications regarding their suitability for various class-room instructional purposes or for other purposes like co-curricular activities and suitable playgrounds.

Before a school is accorded recognition for regular functioning it has to fulfil several conditions, including building requirements laid down by the agency according recognition. But if the managements running these institutions had to fulfil in letter and spirit all the conditions particularly about school buildings, a sizable number of schools including those managed by the agencies according recognition, would not have come into existence, particularly in the rural areas. Resigned to the reality of the conditions prevailing in the country and financial constraints the authorities had to take a flexible view of school buildings while according recognition particularly when a massive national effort was called for in order to fulfil the Constitutional assurance in Article 45 of the Directive Principles. Evidently this flexibility has led to the remarks in the UNESCO study which is not only true of this country but also of several others in the Asian region.

In this report on the survey of school buildings, it is proposed to present (1) condition of school buildings and ownership (2) original purpose for

which school accommodation was raised and utilisation of this accommodation at present for purposes other than schools (3) Area available for instructional and non-instructional purposes (4) Shortage of rooms and expansion potential (5) Space for farming/agriculture (6) Playground facilities and (7) Hostel facilities and number of inmates.

The analyses of the data have been made with main accent on variables like rural and urban as also managements which include government, local bodies, private aided recognised and private unaided but recognised. An attempt has also been made to cover unrecognised institutions but no attempt has been made to interpret the data concerning them. The data has been analysed for each stage of education separately. The tables presented provide at first a national picture at each stage of school education in respect of the above-mentioned variables. The national tables are followed by statewise position, in respect of each aspect of school buildings mentioned above. While interpreting the results an overall view has been taken with intermanagement comparison presenting briefly a comparison between the states, followed by position in rural and urban areas and comparison between managements for each school stage separately on the various aspects detailed above.

Condition of School Buildings

Flexibility in according recognition to educational institutions has kept a sizable proportion of children away from the school rather than in the school particularly in rural areas. While schools are run in open space, tents and thatched huts which expose children to vagaries of weather; it cannot be taken for granted that those schools which are running in buildings are fit for the purpose. While part of them are functioning in pukka buildings according to the state government's specifications, there are sizable ones which are located either in partly pukka buildings or kuchcha buildings.

To start with, it is not expected that all the schools own their buildings. Such a situation compels them either to hire buildings or accept rent free buildings to run the schools which may not necessarily be fit for running them since the original purpose for which they were constructed could have been quite remote from providing schools. While some of these purposes could be identified and classified broadly as for the purpose of residence, panchayat halls as also religious places, the rest would leave one guessing about the original purposes for which the accommodations were raised.

The following paragraphs bring out the condition of school buildings in rural and urban areas and their ownership.

Primary Schools

At this stage there are 4,55,729 primary schools of which 2,39,921 (52.65%) have pukka buildings and another 42,499 (9.33%) have partly pukka buildings. Of the remaining 1,73,309 (38.02%) schools as many as 1,00,274 are in Kuchcha buildings and another 27,707 in open space. Large number of

institutions at this stage are managed by government or local Bodies, 4,25,412 (93.2%). But coming to proportions it is observed that 84.94% have pukka or partly pukka buildings under these managements whereas only 69.76% of the schools under private managements have their schools in pukka or partly pukka buildings. Among the states it is observed that in Gujarat (83.9%), Haryana (95.3%), Karnataka (77.3%), Kerala (92.7%), Punjab (87.8%), Rajasthan (73.6%), Tamil Nadu (82.8%) and Uttar Pradesh (79.5%) more than 70% schools have pukka or partly pukka buildings. At the other extreme are the states of Andhra Pradesh (54.3%), Bihar (41.5%), Orissa (42.8%) and West Bengal (42.3%) where less than 60% schools have pukka or partly pukka buildings.

Buildings in rural areas

Of the 4,14,151 primary schools functioning in rural areas it is observed that only 2,45,714 (59.22%) have pukka or partly pukka buildings. Of the remaining 1,68,347 (40.78%) schools 27,190 (6.56%) schools are working in open space.

Buildings in urban areas

The position is far better in Urban areas in that, out of 41,578 primary schools 36,706 (88.28%) schools have pukka or party pukka buildings and only 517 (1.24%) schools are working in open space.

Middle Schools

There are 90,681 middle schools in the country of which 69,995 (77.19%) have either pukka or partly pukka buildings. Unlike primary schools there are only 938 (1.08%) middle schools which are running in

open space. As in the case of primary schools, even at this stage majority of the schools 70,346 (77.6%) are managed either by government or local bodies to contribute to the fulfilment of the Constitutional Directive under Article 45. A comparison between schools under various managements reveals that at this stage as against 78.8% middle schools under private management with pukka or partly pukka buildings, only 76.7% school buildings under government or local body management have this type of buildings which call for suitable immediate action. Considering the position in the states it is found that the position is much better in the states of Bihar (70.4%), Haryana (99.6%), Karnataka (87.7%), Kerala (86.8%), Madhya Pradesh (86.3%), Maharashtra (85.5%), Punjab (97.1%), Rajasthan (90.4%), Tamil Nadu (91.7%) and Uttar Pradesh (81.6%) where more than 70% schools are having pukka or partly pukka buildings whereas in the states of Assam (36.9%), Manipur (36.5%), Meghalaya (48.7%), Nagaland (40.3%), Orissa (44.8%) and Tripura (29.7%) less than 50% middle schools have pukka or partly pukka buildings.

Buildings in rural schools

Out of 90,681 middle schools in the country 75,728 (83.5%) are located in rural areas. Of the 75,728 middle schools located in rural areas 56,058 (71.2%) have either pukka or partly pukka buildings. The number of schools working in open space constitute 1.21% although this should not be the case at this stage.

Buildings in urban schools

There are 14,953 (16.5%) middle schools in urban areas of which 13,137 (93.21%) have pukka or partly pukka buildings and a very small number of schools, 40 (0.27%), are working in open space.

Secondary Schools

There are 33,116 secondary schools in the country of which 22,900 (69.18%) are located in rural areas and the remaining 10,216 (30.82%) in urban areas. There is a revealing change in the management of the institutions at this stage; in that more than 60% secondary schools, 63.14%, are managed by private agencies as against just 6.8% at the primary and 22.4% at the middle stages.

Of these secondary schools, 23,794 (71.85%) schools with pukka buildings and another 6,118 (18.47%) with partly pukka buildings together account for 90.32% of all the school buildings. Only 29 (0.09%) schools are working in open space

and another 21 (0.6%) in tents. In all the states except Assam (21.5%), Himachal Pradesh (68.3%), Manipur (51.35%) and Tripura (44.6%) more than 80% schools have pukka or partly pukka buildings while a few of them have more than 90% in this category. Tripura, as in the case of middle schools, has the least number of pukka and partly pukka buildings.

Buildings in rural schools

Out of the 22,900 secondary schools in rural areas 15,160 (66.20%) schools have pukka buildings and another 4,907 (21.43%) partly pukka. Only 20 (0.09%) of the 22,900 secondary schools are in open space.

Buildings in urban schools

Position in urban schools is much better in that, of the 10,216 schools situated in this area 8,634 (84.51%) are in pukka buildings and 1,211 (11.85%) in partly pukka buildings. Only 9 (0.08%) are in open space.

Higher Secondary Schools and Pre-university, Intermediate and Junior Colleges

Unlike the earlier school stages where the number of institutions in rural areas were much more than in urban areas, at this stage it is observed that 5,408 (56.9%) of the 9,505 institutions are located in urban areas. As in the case of secondary schools 5,940 (62.46%) institutions under this category are managed by private bodies. As many as 7,531 (79.2%) institutions are working in pukka buildings while 1,511 (15.90%) are working in partly pukka buildings. It is observed that 9(0.09%) institutions are working in open space of which 7 are in rural areas. Regarding condition of buildings under various managements it is found that 90.09% privately managed institutions are running in either pukka or partly pukka buildings whereas 95.6% of the government, local body institutions are situated in pukka or partly pukka buildings. Except Himachal Pradesh, Maharashtra and West Bengal in all other states the position is very satisfactory.

Buildings in rural schools

In only 90.92% of the 4,097 institutions located in rural areas the buildings are pukka (2,763) or partly pukka (962). Further 7 of the 9 institutions running in open space are located in these areas.

Buildings in urban schools

In urban areas the position is very encouraging in that out of 5,408 institutions 4,768 (88.18%) have

pukka buildings and another 549 (10.15%) in partly pukka buildings, thus accounting for 5,317 (98.33%) of the 5,408 institutions. There are just 2(0.4%) institutions which are working in open space.

Thus, it is observed that much attention needs to be given to the construction of school buildings for primary and middle schools particularly in rural areas if universalisation of education is to be achieved.

Ownership of School Buildings, Adequacy and the Original Purpose for Which They Were Built

During the plan periods accent was laid mainly on quantitative expansion and hence the thrust in this direction had naturally to overlook the consideration of the availability of adequate number of the school buildings or their suitability for running schools although each state has set its own norms for granting recognition or determining aid to schools. Moreover the privately managed institutions which are governed by the Grant-in-Aid Rules in the state are entitled for subsidising rent of the school building. Further, various philanthropic institutions and individuals, apart from government or local bodies, would have provided space for running the schools either permanently or temporarily pending alternate arrangements. In either case the suitability or otherwise of the building for running a school is debatable. Hence in the following paragraphs the ownership of the school buildings, adequacy, the purpose for which these buildings were constructed has been discussed.

OWNERSHIP AND ADEQUACY

Primary Schools

Among the 4,55,729 primary schools, 3,11,758 (68.42%) owned their accommodation and 36,080 (8.0%) rented them while 75,427 (16.23%) schools were functioning in rent-free accommodations. The remaining 32,464 (7.35%) had a combination of all the three elements regarding ownership. About the adequacy of space, only 1,96,338 (43%) schools had adequate accommodation while accommodation in the remaining 2,59,391 (57%) schools was inadequate. Considering the adequacy from the

ownership point of view it is observed that while adequacy (50.04%) and inadequacy (49.96%) was almost at the same level amongst those schools which owned their accommodations, it was low in case of rented accommodation 42.38% and 57.62% and very poor in respect of rent free accommodation 25.86% and 74.14%. From the management angle it is seen that only 41.88% schools managed by government or local body have adequate accommodation while it is 61.38% in case of privately managed institutions. It is observed that accommodation is inadequate in a large number of schools and in only the states of Gujarat (73.21%), Haryana (51.89%), Karnataka (56.34%), Kerala (57.45%), Manipur (63.3%) and Tamil Nadu (53.73%) accommodation is adequate in more than 50% schools.

Position in rural schools

Among the 4,14,191 primary schools situated in rural areas 2,92,379 own their accommodation, 21,491 have rented accommodation and 71,329 schools are working in rent free accommodation. The rest have a combination of these features regarding ownership. Only 1,75,893 (42.51%) schools have adequate accommodation. Managementwise only 1,64,862 (41.25%) of the 3,99,676 government and local-body-managed schools have adequate accommodation as against 11,021 (63.07%) schools managed by private agencies.

Position in urban schools

In urban areas out of 41,578 schools, 21,379 (51.44%) schools own their accommodation, 14,589 (35.01%) have rented accommodation and

4,098 (9.85%) have rent-free accommodation. Out of the total number of schools in urban areas 20,455 (49.28%) have adequate accommodation which is much better than that obtaining in rural schools. From the managements angle it is observed that only 42.43% government and local-body schools have adequate accommodation as against 68.02% schools under private management.

Middle Schools

Among the 90,681 middle schools, 69,347 (76.52%) own their school accommodation, 9,065 (10.0%) function in rented accommodation and 4,655 (5.13%) in rent free accommodation. Others are functioning in partly owned, partly rented, partly rent-free and different combinations of accommodation. But only 38,145 (42.13%) schools have adequate accommodation. Analysing accommodation of middle schools under different managements it is noted that among the 75,687 government and local-body-managed schools 27,492 (36.33%) had adequate accommodation as against 12,653 (66.84%) schools under private management. Amongst the schools owning the accommodation 31,484 (45.53%) have adequate space which in case of rented accommodation is in 3,572 (55.59%) and rent free accommodation 1,566 (27.75%) schools respectively. Except Jammu and Kashmir in all other states more than 60% middle schools have their own accommodation which exceeds 90% in Haryana, Manipur and West Bengal. Except Bihar, Haryana, Kerala, Manipur, Orissa, Uttar Pradesh and West Bengal, in all other states more than 50% of the schools do not have adequate accommodation.

Position in rural schools

Of the 75,728 middle schools 60,660 (80.19%) have their own accommodation and 9,301 schools either function in rented (4,535) or rent-free (4,766) accommodation. Only 30,795 (40.69%) middle schools have adequate accommodation. In terms of management it is found that only 35.38% of the government/local-body schools have adequate accommodation as against 65.47% schools with adequate accommodation under private management.

Position in urban schools

Among the 14,953 middle schools 6,275 (42.0%) schools have their own accommodation while 3,543 schools either function in rented (2,834) or rent-free (709) accommodation. Of the total middle schools in urban areas 7,350 (49.16%) schools have adequate accommodation. In government and local-body-managed schools only around 38.23% schools

have adequate accommodation while in case of privately-managed institutions this figure is 69.98%.

Secondary Schools

Out of 22,869 (69.18%) secondary schools accommodation is owned by the management of 10,247 schools, 7,119 (21.45%) have rented their accommodation and 1,776 (5.44%) function in rent-free accommodation. In 19,267 (58.31%) schools the available accommodation is adequate. Only 4,855 (41.18%) of the 11,936 government/local-body-managed schools have adequate accommodation while in case of privately-managed institutions this figure is 14,412 (65.75%). When examined state-wise it is observed that in all the states except Gujarat, Karnataka and Maharashtra more than 50% schools own their accommodation. Further in Andhra Pradesh, Assam, Himachal Pradesh, Jammu & Kashmir, Meghalaya, Orissa, Punjab and Tamil Nadu more than 50% secondary schools do not have adequate accommodation.

Position in rural schools

16,864 (73.8%) of the 22,900 secondary schools own their school accommodation. Of the remaining 5,036 schools 3,773 (16.59%) are functioning in rented and another 1,358 (5.93%) in rent-free accommodation. Amongst the schools in rural areas 12,872 (56.11%) have adequate accommodation. Under various managements it is found that among the 9,215 government/local-body-managed schools 3,648 (39.59%) have adequate accommodation while this figure in case of privately-managed schools is 9,224 (67.15%).

Position in urban schools

Among the 10,216 secondary schools 6,005 (58.78%) schools own their accommodation, 3,346 (34.31%) have rented it while 418 (3.92%) have rent-free accommodation. In 6,395 (62.75%) secondary schools the available accommodation is adequate. As against 69.33% privately managed schools with adequate accommodation it is observed that only 44.44% government/local-body secondary schools have adequate accommodation.

Higher Secondary Schools/Intermediate, Pre-university and Junior Colleges (not attached to Degree Colleges)

There are 9,505 institutions at this level, of which 6,941 (72.63%) own their accommodation, 1,657 (17.46%) hire them and for another 434 (4.52%) it is rent-free. In only 5,535 (58.23%) institutions the available accommodation is adequate. While in 71.94% of the privately-managed institutions the

accommodation is adequate, it is observed that only 39.74% government/local-body institutions enjoy adequate accommodation. Except in Gujarat, Jammu & Kashmir, Karnataka and Maharashtra where less than 50% institutions own their accommodation, in all other states 50% or more institutions own their accommodation. As regard adequacy, it is found that in Bihar, Gujarat, Karnataka, Kerala, Maharashtra, Manipur, Punjab, Rajasthan, Tripura, Uttar Pradesh and West Bengal 50% or more institutions have adequate accommodation.

Position in rural schools

Among the 4,097 institutions situated in rural areas 3,015 (73.66%) own their accommodation, 701 (17.07%) hire the same while 209 (5.12%) are functioning in rent-free accommodation. In 2,142 (51.2%) institutions the available accommodation is adequate. From the angle of management also more institutions managed by private agencies, 66.26% have adequate accommodation as against only 32.73% institutions under government/local-body having such accommodation.

Position in urban schools

There are 5,408 institutions functioning in urban areas of which 3,926 (72.64%) own their accommodation, 956 (17.74%) hire them and 225 (4.25%) function in rent-free accommodation. In 3,393 (61.0%) institutions the available accommodation is adequate. While 74.46% institutions managed by private agencies have adequate accommodation only 45.27% institutions managed by government/local-body institutions have adequate accommodation.

ORIGINAL PURPOSE FOR WHICH THE RENT-FREE BUILDINGS WERE BUILT,

If a school is opened without a building of its own, the space is either hired by the management or alternate accommodation is provided either by philanthropic organisations or individuals or even public undertakings or local administrations. In both the latter cases it cannot be said with certainty that the building of institution originally constructed could be suitable for running a school. During the third survey it was found that 83,292 (14.1%) out of 5,89,031 schools from primary through higher secondary schools etc. were running in exclusive rent-free buildings. These do not include those schools which were having combined features of buildings. Of these schools 77,662 (93.28%) are

in rural areas. The following paragraphs present the position of the original purpose for which the buildings were constructed which will give an idea regarding the fitness of these buildings for schooling purposes.

Primary Schools

At this stage 75,427 (16.55%) schools have rent-free buildings of which 71,329 (9.56%) are in rural areas and 4,098 (5.44%) in urban areas. Amongst these buildings 16,275 (21.61%) were constructed for religious purposes, 25,826 (34.21%) for residential purposes and 9,750 (12.9%) were chaupals. The remaining 23,576 (31.28%) buildings were raised for various other purposes.

Of the schools running in rent-free buildings 72,964 (96.28%) are managed by government local-body and 2,463 (3.72%) by private bodies. This is understandably so since more than 80% of the primary schools are under the management of the former category.

As regards rural institutions, 24,959 (36.47%) schools were running in buildings constructed for residential purposes and 21,719 (30.43%) for various other purposes. The remaining 24,651 (33.10%) were functioning either in religious places, 15,110 (21.18%) or in chaupals, 9,541 (11.92%).

Among the 4,098 urban schools a large number of schools were functioning either in religious places, 1,165 (29.27%) or any other place, 1,848 (46.39%). The other 1,085 schools were functioning in private houses, 867 (21.95%) and in chaupals, 218 (2.39%).

Middle Schools

There are 5,655 (6.24%) middle schools working in rent-free buildings of which 4,766 (84.27%) are in rural areas and 889 (15.73%) in urban areas. Schools working in religious places, 1,152 (20.32%), in chaupals, 1,134 (20.0%) and in a variety of other accommodations, 2,475 (43.82%) were comparatively larger than those functioning in private houses, 894 (15.86%). As in the case of primary schools at this stage also 4,900 (86.57%) schools managed by government or local body are functioning in rent-free buildings and the remaining 755 (13.43%) are privately managed ones.

Of the 4,766 rural schools, most of them are working in chaupals, 1,110 (23.27%) or in other types of accommodations 1,956 (41.09%). Schools functioning in religious places constitute 20.13% (963) and the remaining 15.51% (737) functioning in private houses.

Even among the comparatively small number of schools, 889 working in rent-free buildings as many as 519 (58.47%) are located in buildings constructed for other purposes and 189 (21.35%) in religious places. Of the remaining 181 schools, 157 (18.0%) are located in private houses and only 24 (2.18%) in chaupals.

Secondary Schools

Considering the earlier two stages, a comparatively smaller proportion, 1,776 (5.43%) of the 33,116 secondary schools are functioning in rent-free buildings. As against 1,358 (6.1%) of the 22,900 rural schools which run in rent-free buildings only 418 (3.9%) of the 10,216 urban schools are working in similar accommodation. Amongst these schools 1,358 (76.4%) are in rural areas and 418 (23.6%) in urban areas. More than 50% of these schools, 56.74% (1,012), to be more precise, are working in buildings constructed for various purposes whereas schools working in religious places, private houses and chaupals are 16.29% (286), 15.16% (272) and 11.11% (206) respectively. The government/local-body-managed schools contribute 916 (51.12%) schools as against 48.88% privately-managed schools for this purpose.

Of the 1,358 rural schools running in rent-free buildings, 740 (54.41%) are in buildings constructed for other purposes and of the remaining 618 (45.59%), for religious 224 (16.18%), domestic 203 (14.71%) and chaupals 191 (14.70%) respectively. Of the 418 urban schools running in rent-free buildings nearly 65.07% (272) are working in other places while 62 (14.83%) are working in religious places, 69 (16.51%) in private houses and 15 (3.59%) in chaupals respectively.

Higher Secondary Schools and Intermediate Colleges

Even at this stage 434 (4.57%) of the 9,505 institutions are functioning in rent-free buildings which include 209 (48.16%) located in rural areas and the remaining 225 (51.84%) in urban areas. The rural institutions under this category constitute 4.88% of the 4,097 while the urban ones constitute 3.7% of the 5,408 urban schools. 282 (64.93%) of the 434 schools are working in buildings constructed for any other purpose whereas the schools working in places constructed for religious, domestic and for chaupals are 44 (10.14%), 48 (11.06%) and 60 (13.87%) respectively. Further 248 (57.14%) schools under government/local-body-management are in rent-free buildings while 186

(42.86%) privately-managed institutions are in this category.

Of the 209 rural school buildings 122 (58.37%) were constructed for any other purpose while 48 (24.43%) for chaupals. 20 (9.1%) schools were in domestic buildings and the rest, 19 (9.1%) in religious places.

Among the 225 schools functioning in rent-free buildings in urban areas, 160 (71.11%) are located in any other place whereas 25 (11.11%), 28 (12.44%) and 12 (5.34%) schools are functioning in religious and domestic places and chaupals respectively.

ORIGINAL PURPOSE FOR WHICH THE SCHOOL ACCOMMODATION WAS RAISED

There were 5,89,031 recognised schools from primary through higher secondary schools and independent intermediate, pre-university and junior colleges of which 28,703 (4.92%) were working in open space while the rest were working in pukka, partly pukka, kuchcha buildings or thatched huts and tents. It is difficult to visualise that the accommodation available for these schools were originally raised to house schools. As such it is worthwhile to examine the original purpose for which these accommodations were raised keeping in view the rural and urban characteristics as also managements at various school stages.

Primary Schools

Among the total number of 4,55,729 primary schools, 27,707 (6.14%) were working in open space, comprising 27,190 rural ones and the remaining 517 urban schools. This leaves 4,28,022 schools which were housed in different types of accommodation. However, 3,11,584 (72.9%) schools had their accommodation constructed for this purpose alone while 48,350 (11.21%) were housed in residential accommodation. The remaining 68,088 were located in religious places 22,094 (5.14%), in panchayats 8,125 (1.87%) and 37,869 (8.88%) in any other place respectively. According to the types of management, out of 3,99,114 schools managed by government or local-body, accommodation for 2,90,912 (72.93%) were originally raised for running schools as against 20,672 (71.63%) in this category under private managements. There is not much difference between the rural schools and urban ones in respect of the original purpose for which the accommodation was raised.

Position in rural areas

Out of 3,86,961 rural schools working in raised accommodation, 2,87,759 (74.42%) had their accommodation right from the beginning for schooling purposes. Managementwise it is found that the position in schools managed by private agencies was better, as against 79.2% schools in this category which from the beginning had their construction raised for the purpose, schools under government local-body had 74.1% accommodation originally raised for the purpose.

Position in urban areas

As for urban areas it is observed that only 23,825 (57.19%) of the 41,061 primary schools had their accommodation raised for the purpose initially.

The difference between the schools managed by government/local-body and the private management is insignificant in that in the former case there are 57.75% schools with their accommodation originally meant for the purpose as against 58.28% schools in the latter case.

Middle Schools

Only 1,073 (1.21%) of the 90,681 middle schools are working in open space of which 998 are in rural areas and 75 in urban areas. Among the 89,723 schools located in raised accommodation 73,519 (81.94%) were functioning in premises originally constructed for this purpose. The remaining were functioning in buildings originally meant for residential 5,778 (6.37%), religious 2,303 (2.57%), panchayat 1,328 (1.54%) and other purposes 6,795 (7.58%). Among the government/local-body managed 79,586 schools, 57,118 (71.78%) had their accommodation originally raised for this purpose while in case of privately-managed schools this figure was 16,401 (81.59%) which reveals that while the state government concerned insists upon private agencies having proper school accommodation it does not seem to insist about its own schools.

Position in rural schools

There are 74,810 schools having buildings of which 63,538 (84.89%) were originally raised for schooling purposes and the remaining 11,272 for purposes other than schooling like residence 2,707 (3.61%), religious 1,644 (2.14%), panchayat 1,266 (1.74%) and others 5,655 (7.62%). In government/local-body-managed schools 50,462 (84.45%) of the 59,783 were originally had their accommodation for housing schools whereas 13,076 (87.33%) schools

under private management, had their accommodation originally meant for this purpose.

Position in urban schools

In 9,981 out of 11,430 of the urban schools accommodation was meant for schools and another 3,071 (20.80%) for residential purposes. While a small number of schools were meant for religious and panchayat purposes, the other 1,140 (7.39%) were meant for other purposes. Only 6,656 (51.7%) among the government local-body-managed schools had their accommodation meant for this purpose while the corresponding figure under private management was 5,500 (70%). Although far from satisfactory, the position of the privately-managed schools is much better than in government local-body-managed schools.

Secondary Schools

All but 29 of the 30,410 secondary schools are functioning in some kind of raised accommodation of which 26,207 (86.18%) had their accommodation originally constructed for this purpose and another 3,153 (12.69%) were functioning in accommodation meant for residential purposes. Of the remaining 3,657, the majority of schools 2,412 had their accommodation raised for other purposes. 19,242 (83.6%) of the government local-body-managed schools had their original accommodation for purpose of running schools as against 6.56% under private management.

Position in rural schools

20 of the 22,900 schools in rural areas were working in open space. There were 18,682 (81.60%) schools which had their accommodation raised originally for the purpose of school and another 1,100 (7.42%) for other purposes. In 86.96% (7,962) of the 9,200 government local-body-managed schools the original accommodation was meant for schools while in the case of privately-managed ones this figures was 77.37% (13,680).

Position in urban schools

Only 9 among the 10,216 schools were functioning in open space. From the viewpoint of the original purpose for which the school accommodation was raised 7,595 (74.51%) of the 10,207 were meant for this purpose and another 1,580 (15.69%) for residential purpose. Among the 3,014 government local-body-managed schools, 2,280 (75.75%) were having their accommodation raised for school

purposes only as against 5,315 (74.0%) of 7,193 schools under private management.

Higher Secondary Schools and Intermediate Colleges

Although institutions at this level atleast are expected to function in pucca constructions, 9 of the 9,505 were working in open space, 7 in rural areas and 2 in urban areas. Further majority of the institutions are functioning in urban areas. While 8,035 (84.63%) of the 9,496 institutions had their accommodation meant originally for schools only, there were nearly equal number of institutions, 585 (6.21%) and 550 (5.8%), which had their original accommodation either for residential or any other purpose. In 3,109 (87.36%) of the 3,560 institutions managed by either government or local-body, the original accommodation was meant for schools and in case of privately-managed institutions this figure was 4,876 (82.15%).

Position in rural areas

Among the 4,090 institutions, 3,498 (85.57%) had their accommodation specifically for schooling purpose and 201 (4.89%) and 196 (4.8%) for residential or any other purpose. In terms of management 1,345 (87.66%) of the 1,542 government/local-body-managed schools had the facility of accommodation from the beginning for purpose of schools whereas 2,173 (85.1%) of the 2,548 privately-managed schools had this facility from the initial stages.

Position in urban areas

In 4,537 (83.92%) schools out of 5,406 the original accommodation was meant for school purposes and as in case of rural schools the number of schools which had their original accommodation for residential, 384 (7.02%) and other purposes 354 (6.47%) were nearly the same. As in the case of rural areas even among the urban schools, a larger proportion of government-managed schools, 87.13%, had their school accommodation for this purpose alone originally unlike the private ones where only 81.71% had this facility from the beginning.

UTILISATION OF SCHOOL ACCOMMODATION FOR OTHER PURPOSES

Lack of proper and adequate accommodation has not only compelled schools to occupy places like residential accommodation, panchayat samiti

buildings or religious places but also vice-versa i.e., using school buildings to run other schools, part-time classes, hold panchayat meetings and religious gatherings, organise public libraries and for various other purposes. This phenomenon exists both in rural as well as in urban areas although a small proportion of schools are utilised for the purposes.

Out of 5,89,031 schools at all stages of school education only 43,537 (7.47%) are put to use for the above-mentioned purposes which include 35,583 (6.12%) in rural areas and 7,954 (1.36%) in urban areas. Coming to the proportion of schools within their own areas, 6.11% among the rural schools and 11.11% among the urban schools are utilised for such purposes.

Primary Schools

In 34,401 (7.45%) primary schools their accommodation is used for other purposes. Of these schools 29,928 are in rural areas and 4,473 in urban areas. The same premises can be used for more than one purpose. Religious gatherings (15,252) and other purposes (12,000) are the most predominant ones for which these premises are used followed by panchayat meetings. But this is mostly in rural schools. In urban, majority of them are used for running other schools.

Middle Schools

Among the 5,958 schools whose accommodation is used for other purposes in quite a large number of schools, 2,460, the premises are used for running other schools. As in the case of primary schools, even at this stage more school premises are used in urban areas for running other schools. As regards other activities, both in rural as well as urban, religious activities occupy the next position.

Secondary Schools

At this stage 1,968 schools are being utilised for other purposes of which 1,227 provide for running other schools. As usual religious gathering and social and community purposes are the more predominant ones amongst other purposes.

Higher Secondary Schools and Intermediate Colleges

As compared to secondary schools a larger proportion, 1,210 (12.63%) of the 9,505 institutions, are utilised for other purposes of which running other schools, 849, is the most important one. As in all the preceding stages even here more institutions in urban areas are used for this purpose.

Area for School Campus, Instructional Purpose and Non-instructional Purpose

A school campus comprises of buildings and open space which are used for both instructional and non-instructional purposes. Absence of proper environment impedes both physical and academic development of pupils. Apart from shortage of instructional area, non-availability of suitable play-grounds, space for gardening or agriculture contribute in no small measure towards the apathy of children attending the school. In the following paragraphs the present position regarding area for school campus, instructional and non-instructional purpose has been outlined. The information available also reveals that all the schools have not reported regarding area for instructional and non-instructional purposes.

Primary Schools

There are 4,55,729 primary schools having mean-area for school campus 1090.98 sq. m. The private-aided primary schools have maximum mean-area for school campus (1590.93 sq. m.) followed by private-unaided recognised schools (1488.59 sq. m.). The government primary schools have minimum mean-area for school campus i. e. 106.89 sq. m. Among the states Tripura having only 0.33% primary schools has maximum mean-area for school campus as 6113.49 sq. m. In Uttar Pradesh, Bihar and Madhya Pradesh comprising more than one third (35.64%) of primary schools the mean-area for school campus is 796.22 sq. m., 958.62. sq. m. and 773.75 sq. m. respectively. In the state of Jammu & Kashmir which is a hilly state the mean-area for school campus is minimum (244.77 sq. m.). Among union territories Chandigarh and Pondicherry have 14018.31 sq. m. and

490.03 sq. m. respectively as maximum and minimum mean-area for school campus.

Of the total number of primary schools 4,22,859 (92.79%) have reported regarding area for instructional purpose and 2,08,884 (45.84%) have reported regarding area for non-instructional purpose.

The mean-area for instructional purpose is 123.44 sq. m. for 4,22,859 primary schools reported. The private-aided recognised schools have maximum mean-area for instructional purpose (273.16 sq. m.) followed by private-aided schools (224.54 sq. m.). Government schools have minimum mean-area for instructional purpose i. e. 108.59 sq. m. Among the states mean-area for instructional purpose is maximum for schools in Assam (620.27 sq. m.) and minimum for schools in Himachal Pradesh (62.47 sq. m.). Among the union territories mean-area for instructional purpose is maximum for schools in Chandigarh (397.42 sq. m.) and minimum for schools in Dadra & Nagar Haveli (44.84 sq. m.).

The mean-area for non-instructional purpose is 424.96 sq. m. for 2,08,884 primary schools who have reported. The private-unaided recognised schools have maximum mean-area for non-instructional purpose (6661.11 sq. m.) followed by local-body schools (433.37 sq. m.). The private-aided schools have minimum mean-area for non-instructional purpose i.e. 377.24 sq. m.

Rural primary schools

There are 4,14,151 (90.88%) primary schools in rural areas having 1086.59 sq. m. as mean-area for school campus. The mean-area for school campus in rural areas is maximum in the case of private-aided schools (1701.89 sq. m.) and minimum for government schools (1041.39 sq. m.).

Information regarding area for instructional purpose has been given by 3,82,589 (92.38%) rural primary schools and 1,82,784 (44.13%) schools have reported regarding area for non-instructional purpose.

The mean-area for instructional purpose is 108.33 sq. m. for 3,82,589 schools reporting in this regard. The mean-area for instructional purpose in rural areas is maximum for private-aided schools (174.29 sq. m.) and minimum for government schools (101.70 sq. m.).

The mean-area for non-instructional purpose is 420.54 sq. m. for 1,82,784 schools reporting on this subject. The mean-area for non-instructional purpose in rural areas is maximum in the case of private-unaided recognised schools (769.29 sq. m.) and minimum for private-aided schools (373.17 sq. m.).

Urban primary schools

With only 9.12% (41,578) primary schools in urban areas the mean-area for school campus is 1135.48 sq. m. The mean-area for school campus in urban areas is maximum for private-unaided recognised schools (1578.48 sq. m.) and minimum for government schools (833.20 sq. m.).

Information regarding area for instructional purpose has been reported by 40,270 (96.85%) urban primary schools and 26,100 (62.77%) schools have given information regarding area for non-instructional purpose.

The mean-area for instructional purpose for 40,270 schools giving this information is 269.24 sq. m. with maximum for private-unaided recognised schools (365.84 sq. m.) and minimum for government schools (194.10 sq. m.).

The mean-area for non-instructional purpose for 26,100 schools furnishing this information is 456.42 sq. m. with maximum for private-unaided recognised schools (602.14 sq. m.) and minimum for government schools (377.10 sq. m.).

Middle Schools

There are 90,681 middle schools having mean-area for school campus 3412.74 sq. m. The private-unaided recognised schools have maximum mean-area for school campus (6272.90 sq. m.) followed by private-aided schools (4808.65 sq. m.). The local-body schools have minimum mean-area for school campus (2487.92 sq. m.). Among the states Tripura with only 0.26% middle schools has maximum mean-area for school campus

11352.20 sq. m. followed by Nagaland (8921.05 sq. m.) with only 0.28% schools. The mean-area for school campus is minimum in Jammu & Kashmir (673.89 sq. m.). The states of Maharashtra and Karnataka comprising 28.85% of the middle schools have only 2028.76 sq. m. and 1391.57 sq. m. respectively as mean-area for school campus. Among the union territories the mean-area for school campus is maximum for middle schools in Arunachal Pradesh (7834.66 sq. m.) and minimum for schools in Pondicherry (1108.35 sq. m.).

Of the total number of middle schools 87,305 (90.30%) have reported regarding area for instructional purpose and 73,666 (76.19%) have reported regarding area for non-instructional purpose.

The mean-area for instructional purpose for 87,305 middle schools has been reported as 350.81 sq. m. The private-aided schools have maximum mean-area for instructional purpose (417.22 sq. m.) followed by local-body schools (377.15 sq. m.). The government middle schools have minimum mean-area for instructional purpose (309.03 sq. m.). Among the states the mean-area for instructional purpose is maximum for schools in Haryana (1084.86 sq. m.) and minimum for schools in Orissa (86.85 sq. m.). Among the union territories the mean-area for instructional purpose is maximum for Delhi (387.42 sq. m.) and minimum for Mizoram (100.91 sq. m.).

The mean-area for non-instructional purpose for 64,341 middle schools who have reported is 1140.50 sq. m. The private-unaided-recognised schools have maximum mean-area for non-instructional purpose (1805.63 sq. m.) followed by local-body schools (1292.80 sq. m.). The private-aided middle schools have minimum mean-area for non-instructional purpose (1028.64 sq. m.).

Rural middle schools

There are 75,728 (83.51%) middle schools in rural areas having a mean-area of 3558.62 sq. m. for school campus. The mean-area for school campus in rural areas is maximum for private-unaided recognised schools (7736.38 sq. m.) and minimum for local-body schools (2520.32 sq. m.).

The information regarding area for instructional purpose has been given by 72,668 (95.96%) middle schools and 52,826 (69.76%) schools have reported regarding area for non-instructional purpose.

The mean-area for instructional purpose for 72,668 schools reporting in this regard is 321.93 sq. m. This area is maximum for private-aided

schools (379.20 sq. m.) and minimum for government middle schools (289.91 sq. m.).

The mean-area for non-instructional purpose for 52,826 middle schools who have reported is 1184.32 sq. m. This area is maximum for private-unaided-recognised schools (2221.81 sq. m.) and minimum for government schools (1049.99 sq. m.).

Urban middle schools

There are 16.49% (14,953) middle schools in urban areas having mean-area for school campus as 2516.77 sq. m. The mean-area for school campus is maximum for private-unaided-recognised schools (2838.09 sq. m.) and minimum for local-body schools (2193.53 sq. m.).

Out of 14,953 middle schools in urban areas 14,637 (97.89%) have reported regarding area for instructional purpose and 11,515 (77.01%) have reported regarding area for non-instructional purpose.

The mean-area for instructional purpose for 14,637 middle schools reporting in this regard is 525.15 sq. m. This area is maximum for local-body schools (676.99 sq. m.) and minimum for government schools (438.14 sq. m.).

The mean-area for non-instructional purpose for 11,515 middle schools who have reported is 899.52 sq. m. This area is maximum for local-body schools (972.66 sq. m.) and minimum for private-aided schools (826.62 sq. m.).

Secondary schools

There are 33,116 secondary schools having mean-area for school campus as 9569.85 sq. m. Government schools have 10884.97 sq. m. as maximum mean-area for school campus followed by private-unaided recognised schools (10619.46 sq. m.). Local-body schools have minimum mean-area for school campus (9001.59 sq. m.). Among the states Tripura with only 0.11% secondary schools has maximum mean-area for school campus (18836.57 sq. m.) while the minimum mean-area for school campus is for schools in Jammu & Kashmir (2225.19 sq. m.).

Out of the total number of secondary schools 32,094 (96.91%) schools have reported in regard to the area for instructional purpose and 28,042 (84.68%) schools have reported in regard to the area for non-instructional purpose.

The mean-area for instructional purpose for 32,094 schools who have reported is 857.65 sq. m. The Government schools have maximum mean-area

for instructional purpose (962.01 sq. m.) followed by private-unaided-recognised schools (877.11 sq. m.). Local-body schools have minimum mean-area for instructional purpose (644.80 sq. m.). Among the states the mean-area for instructional purpose is maximum for Jammu & Kashmir (2112.20 sq. m.) and minimum for schools in Orissa (612.24 sq. m.).

The mean-area for non-instructional purpose for 28,042 schools reporting in this regard is 1177.14 sq. m. The private-unaided-recognised schools have maximum mean-area for non-instructional purpose (2597.66 sq. m.) followed by government schools (2302.52 sq. m.). Local-body schools have minimum mean-area for non-instructional purpose (917.73 sq. m.).

Rural secondary schools

There are 22,900 (69.15%) secondary schools in rural areas having a mean-area of 10856.3 sq. m. for school campus. Private-unaided-recognised schools have maximum mean-area for school campus (12485.24 sq. m.) followed by government schools (11599.63 sq. m.). Local-body schools have minimum mean-area for school campus (9059.96 sq. m.).

Of the rural secondary schools 22,231 (97.08%) have reported regarding area for instructional purpose and 19,373 (84.60%) have reported regarding area for non-instructional purpose.

The mean-area for instructional purpose for 22,231 secondary schools reporting is 770.12 sq. m. This area is maximum for government schools (929.24 sq. m.) and minimum for local-body schools (400.94 sq. m.).

The mean-area for non-instructional purpose for 19,373 schools reporting is 1811.94 sq. m. This area is maximum for private-unaided-recognised schools (3018.84 sq. m.) and minimum for local-body schools (654.88 sq. m.).

Urban secondary schools

There are 30.85% (10,216) secondary schools in urban areas having mean-area of 7059.99 sq. m. for school campus. Local-body schools have maximum mean-area for school campus (8739.15 sq. m.) followed by government schools (8418.34 sq. m.). Private-aided schools have minimum mean-area for school campus (6400.23 sq. m.).

Out of 10,216 urban secondary schools 9,863 (96.54%) have reported regarding area for instructional purpose and information regarding area for

non-instructional purpose has been given by 8,669 (84.86%) secondary schools.

The mean-area for 9,863 secondary schools who have reported regarding area for instructional purpose is 1081.67 sq. m. This area is maximum for government schools (1076.36 sq. m.) and minimum for local-body schools (978.31 sq. m.).

The mean-area for 8,669 secondary schools reporting regarding area for non-instructional purpose is 1690.78 sq. m. This area is maximum for the local body schools (2105.36 sq. m.) and minimum for private-aided secondary schools (1580.40 sq. m.).

Higher Secondary Schools including Intermediate, Junior and Pre-university Colleges

There are 9,505 higher secondary schools having 10579.4 sq. m. as mean-area for school campus. Government schools have maximum mean-area for school campus (11359.28 sq. m.) followed by private-unaided recognised schools (10463.55 sq. m.). This area is minimum for local-body schools (5901.49 sq. m.). Among the states Kerala has maximum mean-area for school campus (31029.52 sq. m.) with only 0.42% schools followed by Haryana (21091.36 sq. m.). This mean-area is minimum in respect of schools in the state of Maharashtra (2560.11 sq. m.). Among the union territories Chandigarh has maximum mean-area for school campus (32656.38 sq. m.) and it is minimum for A & N Islands (6643.8) sq. m.).

Of the total number of higher secondary schools 9,382 (98.71%) have reported in regard to area for instructional purpose and information regarding area for non-instructional purpose has been reported by 8,340 (87.74%) schools.

The mean-area for instructional purpose for 9,383 schools reporting in this regard is 1075.74 sq. m. Private-unaided-recognised schools have maximum mean-area for instructional purpose (1359.09 sq. m.) followed by private-aided schools (1114.33 sq. m.). This area is minimum in respect of local-body schools (933.87 sq. m.). Among the states schools in Haryana have maximum mean-area for instructional purpose (5590.02 sq. m.) followed by Rajasthan (3078.62 sq. m.) and this area is minimum for schools in Orissa (255.57 sq. m.). Among the union territories the schools in Goa, Daman & Diu (6284.08 sq. m.) and Lakshadweep (332.00 sq. m.) have maximum and minimum mean-area respectively for instructional

purpose.

The mean-area for non-instructional purpose for 8,340 schools who have reported is (2832.94 sq. m.) Government schools have maximum mean-area for non-instructional purpose (2942.53 sq. m.) followed by private-unaided-recognised schools (2928.04 sq. m.) and this area is minimum for local-body schools (2201.28 sq. m.).

Rural higher secondary schools

There are 4,097 (43.10%) schools in rural areas having mean-area for school campus as 11002.06 sq. m. This area is maximum for private-aided schools (11961.94 sq. m.) and minimum for local-body schools (5087.60 sq. m.).

The information regarding area for instructional purpose is furnished by 4,061 (9.12%) schools and 3,657 (89.26%) schools reported regarding area for non-instructional purpose.

The mean-area for instructional purpose for 4,061 schools reporting in this regard is 749.42 sq. m. This area is maximum for private-aided schools (832.03 sq. m.) and minimum for private-unaided-recognised schools (517.44 sq. m.).

The mean-area for non-instructional purpose for 3,657 schools who have reported is 2435.99 sq. m. This area is maximum for private-aided schools 2612.54 sq. m. and minimum for private-unaided recognised schools (1638.69 sq. m.).

Urban higher secondary schools

There are 56.90% (5,408) higher secondary schools in urban areas having mean-area of 10023.81 sq. m. for school campus. This area is maximum for government schools (13161.72 sq. m.) and minimum for local-body schools (6595.70 sq. m.).

Information regarding area for instructional purpose has been furnished by 5,321 (98.39%) schools in urban areas and 4,683 (86.59%) schools have reported regarding area for non-instructional purpose. The mean-area for instructional purpose for 5,321 schools reporting in this regard is 1507.81 sq. m. This area is maximum for private-unaided-recognised schools (1800.89 sq. m.) and minimum for local-body schools (1231.05 sq. m.).

The mean-area for non-instructional purpose for 4,683 schools reporting is 3370.05 sq. m. This area is maximum for government schools (3885.98 sq. m.) and minimum for local-body schools (2589.85 sq. m.).

Shortage of Rooms and Expansion Potential

A clear picture of the type and condition of accommodation of the 5,89,031 schools which are functioning in different parts of the country emerges from the preceding sections. While majority of these schools are functioning in pukka accommodation, there is a sizable number which are working in partly pukka, kachcha, thatched huts, tents and even in open space. It cannot be taken for granted that even those schools which are functioning in pukka accommodation have sufficient number of rooms required to run the schools, let alone other schools which are functioning in other types of accommodation. Paucity of rooms can be met either by raising structures within the school premises provided there is scope for expansion or by raising new structures away from the existing school premises in the neighbourhood.

For the present study information has been sought about the shortage in number of rooms in schools as also the number of schools having scope for expansion of their existing premises. For presentation purpose the number of schools having shortage of rooms from 1 to 5 have been presented separately while those having a shortage of more than 5 rooms have been grouped together.

SHORTAGE OF ROOMS

Apart from the fact that many schools are not having proper school buildings of their own, it

should not be surprising if more than 90% (72.6%), to be precise, schools at all stages of school education do not have adequate number of rooms in them. The position is more acute in respect of the earlier stages of school education in comparison to higher stages. As bulk of the schools are at the earlier levels their high percentage eclipses the much better position obtaining at the later stages. As could be expected, the proportion of schools with shortage of rooms are more in rural areas, 3,98,854 (77.18%) than among the urban ones, 29,450 (41.41%). Of 4,28,284 schools which are short of rooms it is observed that 3,69,345 (86.22%) schools alone are at primary level while 48,970 (11.44%) are at the middle stage, accounting together for 4,18,315 (97.66%) schools with shortage of rooms. As regards the proportion of schools at various stages with shortage of rooms, it is observed that 3,69,345 (80.9%) primary schools, 48,970 (54.0%) middle schools, 8,353 (25.2%) high schools and 1,616 (17.0%) higher secondary schools and intermediate colleges are short of accommodation.

Majority of schools, 4,03,622 (94.4%), are short of accommodation ranging from 1 to 4 rooms and a large proportion of these schools are mostly in rural areas, the proportion of schools with shortage of 5 or more rooms increases with higher stages with 2.98%, 20.41%, 29.76% and 30.26% at primary, middle, secondary and higher secondary stages respectively as seen from the following table.

SHORTAGE OF ROOMS AT VARIOUS SCHOOL STAGES IN RURAL AND URBAN AREAS

School Stage	One Room		Two Room		Three Room		Four Room		Five Room		More than Five Room		Total		Grand Total
	R	U	R	U	R	U	R	U	R	U	R	U	R	U

Note :— R = Rural U = Urban

Primary Schools

Only 86,384 (19.1%) primary schools have sufficient number of rooms to run the schools. Of 3,69,345 schools which are short of rooms 3,48,727 are in rural areas and 20,618 in urban areas accounting for 84.3% and 49.5% of the schools located in the respective areas. Management-wise 83.5% government or local-body schools have shortage of rooms as against 44.9% in urban schools. In 3,07,759 (83.5%) schools shortage of rooms is between 2 to 4 and another 50,250 (13.6%) schools need only one additional room each.

Position in rural schools

More than 80% schools (84.3%) need additional rooms and of the 3,48,727 with shortage of rooms 2,94,471 (84.5%) need 2 to 4 rooms, and another 9,054 (2.6%) schools 5 or more rooms, and the remaining 45,202 (12.9%) one room each. In terms of management the shortage of accommodation is in 85.3% schools as against 52.6% in privately-managed schools.

Position in urban schools

The position is far better in urban schools in that 20,618 (49.5%) of the 41,578 lack adequate rooms. Amongst these schools 13,288 (64.5%) need between 2 to 4 rooms and another 5,048 (24.8%) only one room each. As in the case of rural schools, even in urban areas the proportion of schools with inadequate rooms is more amongst government or local-body managed schools, 55.8%, as against 32.1% in privately-managed ones.

Middle Schools

Though not very satisfactory, the position is slightly better at this stage in comparison to the primary stage in that around 46%, 41,711 of the 90,681 middle schools have adequate rooms. As usual there is a larger proportion of rural schools in this category, 56.6% which need more rooms than the urban ones, 40.1%. Also the proportion of schools requiring additional rooms is higher amongst government or local-body-managed schools 64.6%, in comparison to just 17.2% schools under private-managements. Unlike the primary stage where fewer schools needed 5 or more rooms, at this stage there are 10,323 (21.0%) and 29,292 (59.9%) schools which need 2 to 4 rooms respectively.

Position in rural schools

As already mentioned 42,870 (56.6%) of the 75,728 rural middle schools have adequate rooms ranging from 1 to 8 or more. Of these 69,700 are managed either by a government or local-body and the rest 2,008 by private-managements. In terms of proportions of schools under different categories requiring additional rooms 64.6% in government category and 15% in the latter category. In terms of number of rooms 2 to 4 rooms 29,292 (61.5%) schools 2 to 4 are needed, 10,323 (21.0%) one room and in 4,475 (9.6%) schools 5 or more.

Position in urban schools

Of the 6,100 (40.5%) urban schools, 2,061 lack of class rooms, 4,990 a shortage of 1 to 4 rooms, and local-body and the remaining 1,410 by private bodies. Thus around 48% in the former category and 27.5% in the latter category need additional rooms. As regards the number of rooms needed, in the former proportion of schools 71.3% need only one room while the proportion of schools which need 2 to 4 or 5 or more are 47.5% and 31.2% respectively.

Secondary Schools

Only 8,353 (25.2%) secondary schools, unlike 80.9% at the primary stage and 74% at the middle stage need more rooms. Of these 6,311 in rural areas and 2,042 in urban areas. About 47% of the government or local-body-managed schools and 12.4% privately-managed ones are short of rooms. As against 3,303 (39.3%) schools which are short of 2 to 4 rooms there are 2,530 (40.3%) schools which need only one room while the remaining 2,514 (30.31%) need 5 or more rooms.

Position in rural schools

About 72.53% (16,589) of the 22,901 secondary schools have adequate number of rooms. Among the 6,311 which need more rooms, 4,915 are under government local-body managements and 1,396 under private management constituting 53.3% and 10.2% respectively among the schools under different managements. Of these schools, majority 2,618 (41.27%) require between 2 to 4 rooms and another 1,888 (30.0%) just one room.

Position in urban schools

In 2,042 (22.5%) urban schools the number of rooms is not sufficient. Of these schools 861 are government or local-body-managed and 1,181 privately managed. Within the managements they con-

stitute 28.47% and 15.4%, respectively. In sharp contrast to the earlier stages, more schools 709 (34.72%) require 5 or more rooms whereas 685 (33.82%) schools need 2 to 4 rooms and the remaining 648 (31.46%) only one room.

Higher Secondary Schools

By far the largest proportion of schools having sufficient number of rooms is at the higher secondary stage, 83.0%. Out of 9,505 schools, 926 rural schools and 690 urban schools constituting 22.5% and 12.76%, respectively within the areas have shortage of accommodation. In terms of management as against 29.21% schools under government or local-body-managed having shortage of rooms, in privately-managed schools it is 11.44%. At this stage there are 615 (38.27%) schools having 2 to 4 rooms less and another 489 (30.25%) having shortage of 5 or more rooms.

Position in rural schools

In about 22.5% schools the number of rooms are not sufficient. Amongst these, 644 are managed by local body and government and 282 by private bodies. Thus it is observed that there is a larger proportion, 41.7%, in the former group as compared to 11.04% in the latter. Again there are more schools, 389 (41.93%) which require 2 to 4 rooms and 226 (24.7%) which need 5 rooms or more.

Position in urban schools

The position is even better in urban areas where just 690 (12.76%) schools need more rooms. But as in the earlier cases even here a larger number of government or local-body schools, 392 need additional rooms as against 292 institutions under private management. However the largest number of schools 261 (38.12%) require 5 or more rooms and another 226 (33.33%) between 2 to 4 rooms.

EXPANSION POTENTIAL OF SCHOOL BUILDINGS

From 31,585 (5.43%) schools there was no response regarding the expansion potential of school building. All the higher secondary schools, intermediate, junior and pre-university colleges have supplied information. It is observed that in 3,35,988 (57.0%) schools at all stages of education there is scope for expansion. There is scope for expansion amongst a larger proportion of rural schools 61.8% as against 48.5% schools in urban areas. As large number of schools in the earlier

stages are managed either by government or local-body the proportion of schools having expansion potential is more among the institutions managed by these agencies.

Considering the overall position 2,42,326 (56.4%) of the 4,55,729 primary schools, 63,588 (70.3%) of the 90,681 middle schools, 23,118 (70.0%) of the 33,116 secondary schools and 6,956 (73.7%) of the 9,505 higher secondary or similar type of institutions have scope for expansion in terms of classrooms. It is worth while to examine in detail the expansion potential at various school stages separately for rural and urban areas.

Primary Schools

Information from 26,925 (5.9%) schools regarding expansion potential was not available. Among the rest 2,42,326 (58.0%) have expansion potential. Expansion potential is available in 58.0% rural schools and 39.0% urban schools. In terms of management in 56.9% government or local-body-managed schools there is scope for expansion as against 59.3% privately-managed schools. Among the states in Andhra Pradesh, Gujarat, Haryana, Maharashtra, Manipur, Meghalaya, Nagaland, Orissa, Punjab, Tamil Nadu, Tripura, Uttar Pradesh and West Bengal more than 50% primary schools have scope for expansion in school premises.

Position in rural schools

Among the 3,90,258 primary schools which have responded in this matter in 2,26,204 (58.0%) schools there is provision for expansion of school buildings. Amongst government and local-body-managed schools 2,15,163 (58.5%) have expansion potential whereas 11,041 (66.6%) of the 16,456 privately-managed schools have scope for expansion.

Position in urban schools

Of the 38,546 (92.8%) schools which have responded only 16,122 (41.2%) have space for expansion within their school premises which include 11,685 government or local-body-managed schools and 3,437 privately-managed ones. The former constitute 41.5% as against 32.7% among the privately-managed ones.

Middle Schools

Only 2,233 (2.2%) of the 90,681 middle schools have not supplied information on this item. Of

those who have supplied information 63,588 (71.8%) schools including 56,009 in rural and 7,579 urban ones have the capacity and scope for expansion. Further 48,321 of these schools are managed by either government or local-body and the remaining 15,267 are managed by private bodies.

Position in rural schools

From the 74,528 rural schools which had furnished information, in 56,009 (75.2%) there is expansion potential in the school buildings. Of these schools 43,501 (77.7%) are government or local-body-managed and the other 12,508 (22.3%) privately-managed. Considering the proportion of schools under managements 43,501 (73.1%) of the 59,519 of government and local-body-managed schools have expansion capacity as against 12,508 (83.3%) of the 15,009 privately-managed schools.

Position in urban schools

In 7,579 (54.7%) of the 13,920 schools there is scope for expansion and among these 4,820 (63.2%) are under government or local-body-management and 2,759 (36.8%) are under private-management. 52.1% in the former category and 58.3% in the latter category have got potential for expansion.

Secondary Schools

About 7.3% (2,427) of the 33,116 secondary schools did not respond to this item and of the 30,689 responding schools, 23,118 (75.2%) including 16,969 rural and 6,149 urban schools have the capacity to expand their accommodation. By management 8,819 (79.3%) government/local-body-managed schools and 14,299 (73.0%) private-managed have scope for expansion.

Position in rural schools

From among the 21,059 schools who have informed about the expansion potential, 16,969 (80.6%) have capacity to expand of which 6,979 (47.1%) are under government or local-body and the remaining 9,990 (52.9%) are under private management. 83.7% among those managed by government/local-body and 78.7% of the privately

managed ones have facility for expansion.

Position in urban schools

Only 5.9% of the 10,216 urban schools did not respond to this item. Of the 9,630 responding schools 6,149 (64.6%) have indicated scope for expansion. Further 1,840 (29.0%) of the 6,149 schools are under government or local-body management and the remaining 4,309 (71.0%) under private management. Among the government or local-body schools 64.3% have scope for expansion and among the private-managed ones 62.3% have it.

Higher Secondary Schools including Intermediate, Junior and Pre-university Colleges

All the 9,505 institutions at this stage, 4,097 located in rural areas and 5,408 in urban areas have responded to this item. In 6,956 (73.7%) institutions there is scope for expansion and 3,363 (48.6%) of these are in rural areas and the remaining 3,593 (51.4%) in urban areas. Unlike the earlier school stages i.e. primary and middle, 2,683 (75.0%) institutions under government or local-body management as against 4,273 (72.9%) privately-managed institutions have expansion potential in them.

Position in rural schools

Among the 4,097 rural institutions 3,363 (82.9%) have scope for expansion of which 1,207 are under government or local-body-management and the remaining 2,156 under private management. Within the managements around 78.6% in the former category and 52.9% in the latter category have scope for expansion.

Position in urban schools

In 3,593 (66.4%) of the 5,408 urban institutions there is scope for expansion. These include 2,019 under government or local-body management and 3,389 are privately-managed. The proportion of institutions under government or local-body-managements is 73.1% and for the privately-managed institutions it is 62.2%.

Area for Farming/Agriculture and Work Experience

The new system of education 10+2+3 lays emphasis on vocationalisation of education. It was observed in the past that most of the schools imparted only academic knowledge to their pupils and neglected other activities particularly farming/agriculture which are so vital for this country as 80% of the children come from rural areas and need some sort of skills in this area. During the Third Survey information was collected on the area for farming/agriculture and work experience. The following paragraphs give an account of facilities available in the schools for this purpose.

Primary Schools

There are 1,00,023 (21.95%) schools which have land for farming/agriculture. The mean-area of such land is 1086.87 sq. m. The proportion of schools having land for farming/agriculture is highest for local-body schools where 26.73% schools have this facility with a mean-area of 1056.87 sq. m. and lowest for private-unaided-recognised schools where only 8.34% schools have this facility with a mean-area of 1490.09 sq. m. Government schools have farm/agriculture land in 18.00% schools with a mean-area of 1168.32 sq. m. Among states only Orissa, Tamil Nadu and Nagaland have farming/agriculture facility in more than 30% of primary schools (71.79%, 55.92% and 36.57% respectively) with mean-area 1399.72 sq. m., 279.81 sq. m. and 534.43 sq. m. respectively. The maximum mean-area for farming/agriculture land is for schools in Maharashtra where only 1.37% of schools provide this facility.

There are only 29,440 (6.46%) primary schools

which have land for work experience with a mean-area of 679.39 sq. m. The proportion of schools having land for work experience is highest for private-aided schools where 10.07% schools have this facility with a mean-area of 549.36 sq. m. and lowest for private-unaided-recognised schools where 3.97% schools have this facility with a mean-area of 777.30 sq. m. Government and local-body schools have this facility among 7.44% and 4.95% schools respectively. The states of Kerala, Tamil Nadu, Bihar, West Bengal and Nagaland have land for work experience in more than 10% schools (19.74%, 11.83%, 11.10%, 10.98% and 10.11% respectively) with mean-area of 471.54 sq. m., 400.21 sq. m., 528.82 sq. m., 992.38 sq. m. and 725.48 sq. m. respectively. The largest mean-area for work experience land is among primary schools in Haryana (1873.88 sq. m.) although only 5.78% schools have this facility.

Rural primary school

There are 95,533 (23.07%) rural primary schools which have land for farming/agriculture with a mean-area of 1107.33 sq. m. The proportion of schools having this facility is highest for private-aided schools of which 30.83% schools have land for farming/agriculture with a mean-area of 790.92 sq. m. and lowest for private-unaided-recognised schools where only 12.09% schools have land for this facility with a mean-area of 1517.73 sq. m. Government and local-body schools have this facility in only 18.91% and 27.61% schools respectively.

Only 27,702 (6.69%) rural primary schools have

land for work experience with a mean-area of 607.93 sq. m. The proportion of schools having this facility is highest for private-aided schools and lowest for private-unaided-recognised schools where 11.90% and 3.69% schools have land for work experience with a mean-area of 563.83 sq. m. and 417.58 sq.m. respectively. Government and local-body schools have this facility in only 7.72% and 5.06% schools respectively.

Urban primary schools

There are 4,490 (10.80%) urban primary schools which have land for farming/agriculture with a mean-area of 645.05 sq. m. The proportion of schools having this facility is highest for private-aided schools (15.76%) with a mean-area of 472.94 sq. m. and lowest for private-unaided-recognised schools (4.34%) with a mean-area of 1406.62 sq. m. Government and local-body schools have this facility in 6.07% and 15.44% schools respectively.

Only 1,738 (4.18%) urban primary schools have land for work experience with a mean-area of 632.67 sq. m. The proportion of schools having this facility is highest for private-aided schools (6.19%) with a mean-area of 490.32 sq. m. and lowest for local body schools (3.61%) with a mean-area of 611.77 sq. m. Government schools have this facility only in 3.76% schools.

Middle Schools

There are 23,075 (25.45%) middle schools which have land for farming/agriculture with a mean-area of 3508.06 sq. m. The proportion of schools having land for farming/agriculture is highest for private-aided schools where 41.40% schools have this facility with a mean-area of 3178.65 sq. m. and lowest for local-body schools where 20.17% schools have this facility with a mean-area of 2469.48 sq. m. Government schools have this facility in 22.03% schools with a mean-area of 3506.12 sq. m. Among the states, Orissa, Tamil Nadu, Nagaland and Kerala have more than 40% middle schools (79.30%, 61.80%, 46.89% and 41.41% respectively) with land for farming/agriculture with a mean-area of 3428.72 sq. m., 653.93 sq. m., 1579.56 sq. m. and 1359.20 sq. m. respectively. The maximum area for farming/agriculture among middle schools is in Uttar Pradesh where 34.77% schools have this facility with a mean-area of 8164.01 sq. m.

There are 9,382 (10.31%) middle schools which have land for work experience with a mean-area of 1405.94 sq. m. The proportion of schools having land for work experience is highest for private-aided schools (13.63%) and lowest for local-body schools (9.13%) with a mean-area of 1623.53 sq. m. and 1045.49 sq. m. respectively. Government schools have this facility for 9.68% schools. Among the states, Kerala, Nagaland, Tamil Nadu, Bihar and West Bengal have this facility in more than 15% schools (40.56%, 28.21%, 18.29%, 18.24% and 17.49% respectively) with a mean-area of 694.00 sq. m., 869.48 sq. m., 664.40 sq. m., 1,911.31 sq. m. and 1632.30 sq. m. respectively.

Rural middle schools

There are 21,054 (27.80%) rural middle schools which have land for farming/agriculture with a mean-area of 3664.91 sq. m. The proportion of schools with this facility is highest for private-aided schools (47.23%) and lowest for local-body schools (21.53%) with a mean-area of 3460.75 sq. m. and 2590.93 sq. m. respectively. Government schools have this facility in 21.53% middle schools.

There are 8,171 (10.80%) rural middle schools having land for work experience with a mean-area of 1482.35 sq. m. The proportion of schools with land for work experience is highest for private-aided schools (14.75%) and lowest for local-body schools (8.78%) with a mean-area of 1752.49 sq. m. and 1126.65 sq. m. respectively.

Urban middle schools

There are 2,021 (13.52%) urban schools which have land for farming/agriculture with a mean-area of 1736.34 sq. m. The proportion of schools having this facility is highest for private-aided schools where 22.85% schools have this facility with a mean-area of 1169.87 sq. m. and lowest for private-unaided-recognised schools where only 9.53% schools have this facility with a mean-area of 4616.91 sq. m. Government schools have this facility in only 9.85% schools.

Land for work experience is available in only 1,181 (7.90%) urban middle schools with a mean-area of 790.03 sq. m. The proportion of schools having this facility is highest for private-aided schools (10.09%) and lowest for private-unaided-recognised schools (5.91%) with a

mean-area of 926.58 sq. m. and 1339.80 sq. m. respectively. Government and local-body schools have this facility in 6.80% and 8.30% schools respectively.

Secondary Schools

There are 9,716 (29.34%) secondary schools out of 33,116 schools which have farming/agriculture land with a mean-area of 7345.25 sq. m. The proportion of schools having land for this purpose is highest for private-unaided-recognised schools (41.25%) and lowest for government schools (25.17%) with a mean-area of 12863.81 sq. m. and 7076.64 sq. m. respectively. Among the states Orissa, Uttar Pradesh, Kerala and Bihar have farming/agriculture land in more than 40% schools (72.49%, 48.35%, 46.01% and 44.29% respectively) with a mean-area of 8976.82 sq. m., 15929.48 sq. m., 3366.75 sq. m. and 9694.19 sq. m. respectively. The maximum area for farming/agriculture land is among schools in Uttar Pradesh.

There are 7,316 (22.09%) secondary schools which have land for work experience with a mean-area of 2298.82 sq. m. The proportion of schools having land for work experience is highest for private-aided schools (27.42%) and lowest for government schools (12.84%) with a mean-area of 2208.97 sq. m. and 2760.39 sq. m. respectively. Among the states Kerala, Maharashtra, Assam and West Bengal have this facility in more than 30% schools (51.79%, 47.79%, 43.50% and 31.02% respectively) with a mean-area of 1818.86 sq. m., 882.88 sq. m., 4314.77 sq. m. and 2672.83 sq. m. respectively. The maximum area for work experience land is among schools in Uttar Pradesh (5776.64 sq. m.) where only 14.68% schools have this facility.

Rural secondary schools

There are 8,248 (36.02%) rural secondary schools which have land for farming/agriculture with a mean-area of 7753.23 sq. m. The proportion of schools with this facility is highest for private-unaided-recognised schools (57.77%) and lowest for government schools (29.15%) with a mean-area of 13844.59 sq. m. and 7442.53 sq. m. respectively.

There are 5,404 (23.60%) rural secondary schools which have land for work experience with a mean-area of 2598.29 sq. m. The proportion of schools with this facility is highest for private-aided schools

(30.28%) and lowest for government schools (14.08%) with a mean-area of 2520.37 sq. m. and 2923.38 sq. m. respectively.

Urban secondary schools

There are 1,468 (14.37%) urban secondary schools which have land for farming/agriculture with a mean-area of 4750.94 sq. m. The proportion of schools with this facility is highest for private-aided schools (30.28%) and lowest for government schools (14.08%) with a mean-area of 2520.37 sq. m. and 2923.38 sq. m. respectively.

There are 1,912 (18.72%) urban secondary schools which have land for work experience with a mean-area of 1361.65 sq. m. The proportion of schools with this facility is highest for private-aided schools (21.87%) and lowest for government schools (9.26%) with a mean-area of 1281.08 sq. m. and 1964.90 sq. m. respectively.

Higher Secondary Schools including Intermediate, Junior and Pre-University Colleges

There are 2,577 (27.11%) higher secondary schools out of 9,505 schools which have farm/agriculture land with a mean-area of 8539.84 sq. m. The proportion of schools having land for farming/agriculture is highest for government schools (29.15%) and lowest for private-unaided-recognised schools (16.20%) with a mean-area of 5761.96 sq. m. and 8579.46 sq. m. respectively. The local-body schools have this facility in 16.62% schools. Among the states only Orissa, Uttar Pradesh, Kerala and Bihar have this facility in more than 30% schools (64.29%, 45.56%, 37.50% and 33.33% respectively) with a mean-area of 5392.23 sq. m., 19234.86 sq. m., 6879.67 sq. m. and 19997.29 sq. m. respectively. The maximum area for farm/agriculture land is among schools in Uttar Pradesh.

There are 1,731 (18.21%) higher secondary schools which have land for work experience with a mean-area of 3386.11 sq. m. The proportion of schools having this facility is highest for local-body schools (21.23%) and lowest for private-unaided-recognised schools (15.89%) with mean-area 2543.59 sq. m. and 3669.40 sq. m. respectively. Among states Assam, West Bengal, Meghalaya, Rajasthan and Maharashtra have this facility for more than 20% schools (35.71%, 29.02%, 25.00%, 21.77% and 21.40% respectively) with mean-area 2800.06 sq. m.,

2935.27 sq. m., 779.00 sq. m., 2030.95 sq. m. and 871.47 sq. m. respectively.

Rural higher secondary schools

There are 1,748 (42.67%) rural higher secondary schools which have land for farming/agriculture with a mean-area of 8884.60 sq. m. The proportion of schools having this facility is highest for private-aided schools (46.05%) and lowest for local-body schools (22.41%) with a mean-area of 10838.85 sq. m. and 4398.17 sq. m. respectively. Government schools have this facility in 39.29% rural higher secondary schools.

There are 1,036 (25.29%) rural higher secondary schools which have land for work experience with a mean-area of 3556.82 sq. m. The proportion of schools having this facility is highest for local-body schools (26.72%) and lowest for private-unaided-recognised schools (22.31%) with a mean-area of 3569.57 sq. m. and 6746.56 sq.

m. respectively. Government higher secondary schools have this facility in 26.68% schools.

Urban higher secondary schools

There are 829 (15.33%) urban higher secondary schools which have land for farming/agriculture with a mean-area of 7564.58 sq. m. The proportion of schools having this facility is highest for government schools (21.16%) and lowest for private-unaided-recognised schools (9.18%) with a mean-area of 7109.33 sq. m. and 4818.11 sq. m. respectively.

There are 695 (12.35%) urban higher secondary schools which have land for work experience with a mean-area of 3106.95 sq. m. The proportion of schools having this facility is highest for local-body schools (18.18%) and lowest for private-aided schools (11.12%) with a mean-area of 1622.31 sq. m. and 3840.33 sq. m. respectively. Government schools have this facility in 16.08% urban higher secondary schools.

Availability of Playground Facility and its Area

For the all round development of a pupil, with a healthy mind in a healthy body, cultivation of sports is inescapable and for this suitable playgrounds are necessary. But in a country like India where a large number of schools do not have even suitable school accommodation, proper playground is sometimes a luxury. While many urban schools may not have playgrounds and are compelled to share with other schools, in rural areas the question is one of suitability even though the grounds are available. Even the Second All India Survey had attempted to determine the extent of availability of playground facilities. In the Third Survey also, an attempt has been made to determine the extent of the availability of this facility.

Primary Schools

There are 1,98,749 (43.61%) primary schools which have playground facility with a mean area of 1077.33 sq. m. Of these 1,45,614 (73.2%) schools have their own playgrounds. As many as 1,85,842 (93.51%) schools have playgrounds exclusively for themselves and 12,907 (6.49%) primary schools share their playgrounds with other institutions. There are 1,41,696 (71.30%) schools having playgrounds owned and used exclusively by themselves, 8,989 (4.52%) schools have playgrounds which are not owned but shared with other institutions. A much larger proportion of private-aided schools (64.27%) have facility of playgrounds with a mean area of 1241.15 sq. m. and the proportion is lowest amongst government schools (39.02%) with a mean area of 1071.19 sq. m. Among the states, Haryana, Tamil Nadu and Tripura have playgrounds in more than 70% schools (78.96%, 76.84% and 71.22% respec-

tively). In the states of Bihar, Jammu & Kashmir and Orissa this facility is available in less than 30% schools (19.11%, 26.18% and 29.39% respectively).

Rural Primary Schools

Primary schools in rural areas having playgrounds are 1,80,547 (43.59%) with a mean area of 1047.24 sq. m. Of these primary schools 1,33,466 (73.92%) have playgrounds owned by schools and 1,69,966 (94.14%) schools have playgrounds exclusively for themselves. The schools having their own playgrounds exclusively for themselves are 1,30,339 (72.19%). The proportion of schools having playgrounds is largest for private-aided schools (68.38%) and lowest for the government schools (39.50%).

Urban Primary Schools

In urban areas 18,202 (43.78%) primary schools have playgrounds with a mean area of 1412.61 sq. m. Of these primary schools 12,148 (66.74%) have playgrounds owned by schools and 15,876 (87.22%) schools have playgrounds for their own use. As many as 11,357 (62.39%) schools have their own playgrounds exclusively for themselves. The proportion of schools having playgrounds is largest for the private-unaided-recognised schools (57.03%) and lowest for government schools (32.79%).

Middle Schools

There are 53,380 (58.87%) middle schools which have playgrounds facility with a mean area of 2419.11 sq. m. Of these schools 40,349 (75.59%) own their playgrounds. As many as 49,607 (92.93%)

schools have playgrounds exclusively for themselves and 3,773 (7.07%) schools have playgrounds shared with other institutions. There are 38,854 (72.79%) middle schools having their own playgrounds exclusively for their use, and 2,278 (4.27%) schools have playgrounds which are not owned but shared with other institutions. Private-unaided-recognised schools have the largest proportion of schools (75.21%) having facility of playgrounds with a mean area of 2613 sq. m. and government schools have the lowest proportion of schools (53.24%) having this facility with a mean area of 2622.25 sq. m. Among the states Kerala, Tripura, Tamil Nadu, Haryana and Nagaland have this facility in more than 70% schools (89.32%, 84.38%, 79.02%, 78.93% and 70.70% respectively) and in the states of Bihar and Assam less than 40% schools have this facility (36.41% and 38.78% respectively).

Rural Middle Schools

Middle schools in rural areas having playgrounds are 45,339 (59.87%) with a mean area of 2451.38 sq. m. Of these 34,627 (76.40%) have playgrounds owned by them and 42,631 (94.03%) schools have playgrounds exclusively for their use. Schools having playgrounds owned and exclusively for their own use are 33,601 (74.11%). Private-unaided-recognised schools have the largest proportion of schools having playgrounds (80.10%) and government schools have the lowest proportion having this facility (54.33%).

Urban Middle Schools

In urban areas 8,041 (53.78%) middle schools have playgrounds with a mean area of 2182.35 sq. m. Of these 5,712 (71.09%) own their playgrounds and 6,976 (86.76%) schools have playgrounds exclusively for themselves. As many as 5,253 (65.33%) schools have their own playgrounds exclusively for their use. The proportion of schools having this facility is largest for private-aided schools (65.10%) and lowest for government schools (46.66%).

High/Secondary Schools

There are 25,942 (78.34%) secondary schools having playground facilities with a mean area of 6463.04 sq. m. Of these secondary schools 18,522 (71.40%) own their playgrounds. As many as 24,157 (93.12%) schools have playgrounds exclusively for their use and 1,785 (6.98%) schools share

their playgrounds with other institutions. 18,024 (69.48%) secondary schools own their playgrounds and for their use only, and 1,287 (4.96%) schools have playgrounds which are not owned by them but shared with other institutions. Private-unaided-recognised schools have the largest proportion of schools (75.21%) having playground facility with a mean area of 4446.30 sq. m. and government schools have lowest proportion of schools (73.71%) having playground facility with a mean area of 7316.11 sq. m. In Tripura (92.11%), Kerala (85.75%), Tamil Nadu (85.73%), Haryana (83.47%), Gujarat (82.92%), Andhra Pradesh (82.64%) and Maharashtra (82.10%) more than 80% schools have playground facility. Nagaland has the lowest proportion of schools (50.60%) with this facility.

Rural Secondary Schools

In 18,902 (82.54%) secondary schools there are playgrounds with a mean area of 6566.65 sq. m. Of these, 13,895 (73.51%) schools own them and 17,914 (94.77%) schools have playgrounds exclusively for themselves. Schools having playgrounds owned and exclusively for themselves are 13,624 (72.08%). Private-unaided-recognised schools have the largest proportion of schools having playgrounds (85.62%) and government schools have the lowest proportion of schools having this facility (77.04%).

Urban Secondary Schools

In urban areas 7,040 (68.91%) secondary schools have playgrounds with a mean area of 6106.75 sq. m. Of these secondary schools 4,627 (65.72%) have playgrounds owned by them and 6,243 (88.68%) schools have playgrounds exclusively for their use. As many as 4,400 (62.50%) schools have playgrounds owned and exclusively for them. The proportion of schools having this facility is highest for private-unaided-recognised schools (76.47%) and lowest for government schools (62.95%).

Higher Secondary Schools including Intermediate/Junior/Pre-university Colleges

There are 7,630 (80.27%) higher secondary schools which have playground facility with a mean area of 6628.35 sq. m. Of these schools 5,913 (77.50%) have their own playgrounds. As many as 7,059 (92.52%) schools have playgrounds exclusively for schools and 571 (7.48%) schools

have playgrounds shared with other institutions. There are 5,622 (73.69%) secondary schools having playgrounds owned and exclusively for themselves and 180 (4.32%) have playgrounds not owned but shared with other institutions. Private-unaided-recognised schools have the largest proportion of schools (85.60%) having the facility of playgrounds with a mean area of 7077.84 sq. m. and local-body schools the lowest proportion (74.06%) having this facility with a mean area of 5206.35 sq. m. Among the states Kerala, Jammu & Kashmir, Haryana, Andhra Pradesh, Tamil Nadu and Punjab have this facility in more than 90% schools (97.50%, 94.81%, 92.33%, 92.31%, 91.61% and 90.98% respectively).

Rural Higher Secondary Schools

Higher secondary schools in rural areas having playgrounds are 3,457 (84.38%) with a mean area of 6270.67 sq. m. Of these schools 2,666 (77.12%) own them and 3,238 (93.67%) sch-

ools have playgrounds exclusively for themselves. The schools having playgrounds owned and exclusively for themselves are 2,547 (73.68%). Private aided schools have the highest proportion of schools having playgrounds (80.47%) and government schools have the lowest proportion of schools having this facility (77.09%).

Urban Higher Secondary Schools

In urban areas 4,173 (77.16%) higher secondary schools have playgrounds with a mean area of 7135.93 sq. m. Of these higher secondary schools 3,247 (77.81%) have their own playgrounds and 3,821 (91.56%) schools have playgrounds exclusively for their use. As many as 3,075 (73.69%) schools have their own playgrounds exclusively for themselves. The proportion of schools having this facility is highest in respect of private-unaided-recognised schools (85.60%) and lowest in the case of local-body schools (74.06%).

Hostel Facility and the Number of Inmates

The Second and the Third All India Educational Surveys have already brought out material regarding educational facilities available at various stages of school education. Although educational facilities have expanded considerably they are by no means evenly distributed, particularly in rural areas. While this has resulted in drop-out of pupils from schools due to non-availability of schooling facilities within a reasonable walkable distance this has also been responsible for the functioning of several economically non-viable schools. Perhaps identifying a suitable school and attaching of hostels and reimbursing part of the expenditure of inmates would have helped in not only more students staying back in schools but also in functioning of several schools more economically and effectively by mobilising the physical facilities in limited number of schools rather than opening more schools with inadequate physical facilities. In the following paragraphs information is provided about the hostel facilities available at various school stages for boys and girls in rural and urban areas.

Hostel facilities at all stages are reported by only 16,309 (2.77%) schools. Of these 12,173 (74.64%) schools have hostels only for boys, 1,693 (10.38%) have only for girls and 2,443 (14.98%) have hostels for both boys and girls. Of the total number of schools having hostel facilities 13,787 (84.54%) schools have hostels exclusively for their use and 2,522 (15.46%) schools share hostels with other institutions. As many as 12,227 (74.97%) schools having hostels own their hostel buildings and the remaining 4,082 (25.03%) schools do not

own their hostel building. Schools having hostels owned and exclusively for themselves are 11,332 (69.48%) and 1,627 (9.97%) schools have hostels which do not own their buildings but share with other institutions.

Amongst the hostels in schools, 1,674 are located in boys schools, 1,258 in girls schools and the remaining 13,377 in co-educational institutions.

Private-aided schools have the largest proportion of schools (13.70%) with hostel facilities followed by private-unaided-recognised schools (6.21%). Local-body schools have the lowest proportion of schools (0.94%) with this facility.

Among the states only Nagaland, Orissa and Meghalaya have hostel facilities in more than 5% schools (18.13%, 7.96% and 5.83%) respectively.

Although 16,309 schools reported possessing hostels only 14,695 have furnished information about the number of inmates. As such the discussion has perforce to be confined to 14,695 schools with hostel facilities. Of these hostels 11,503 (78.28%) are located in rural areas and 3,192 (21.72%) in urban areas. Further 10,630 hostels are meant only for boys and 1,528 only for girls while the remaining 2,537 have hostel facilities for both boys and girls. Among the 7,27,579 residents in the hostels 5,43,428 (74.6%) are boys and 1,84,151 (25.4%) girls. As regards the number of residents in rural and urban hostels, as against 4,78,590 (65.7%) residents in 11,503 hostels in rural areas there are 2,48,979 (34.3%) residents in 3,202 hostels in urban areas. Since the intake capacity of the hostels is not known, no inference can be drawn

about optimum utilisation of this facility. It is observed that among the residents in hostels on an average there are 42 pupils per hostel in 11,503 rural hostels as against an average of around 78 pupils per hostel in 3,192 urban hostels.

Inmates in hostels attached to Primary Schools

In 2,078 (0.46%) primary schools having hostels 94,357 students are residing out of whom 63,568 (67.37%) are boys and 30,789 (32.63%) are girls. Of these 932 (44.85%) schools have only boys hostels with 3,015 residents, 278 (13.38%) schools have only girls hostels with 10,478 girls and 868 (41.77%) schools have both boys and girls hostels providing accommodation to 33,422 boys and 20,311 girls. Private-aided schools having hostels have the largest proportion of schools (2.35%) with 17,273 resident boys and 12,888 resident girls. Government schools having hostels have the lowest proportion of schools (0.30%) with 21,769 boys and 8,398 girls in residence. Among the states only Andhra Pradesh, Manipur and Nagaland have hostel facilities in more than 1% primary schools (1.62%, 1.23% and 1.23% respectively) for 23,257 (16,029 boys and 7,228 girls), 959 (681 boys and 278 girls) and 330 (243 boys and 87 girls) resident students.

Rural Primary Schools

In 1,648 (0.40%) primary schools with hostels, 67,050 students are residing in hostels of whom 47,243 (70.47%) are boys and 19,802 (29.53%) girls. Of these primary schools 762 (46.24%) have only boys hostels with 20,727 inmates, 158 (9.59%) schools have only girls hostels with 5,081 inmates and 728 (44.17%) schools have both boys and girls hostels with 26,521 boys and 14,721 girls. Private-aided schools having hostels are in the largest proportion (2.10%) with 11,289 boys and 5,863 girls. Government schools having hostels are in the lowest proportion (0.28%) with 17,274 boys and 7,049 girls.

Urban Primary Schools

In 430 (1.03%) urban primary schools 27,307 students are residing in hostels of whom 16,320 (59.76%) are boys and 10,987 (40.24%) are girls. Of these urban schools 170 (39.53%) have only boys hostels with 9,429 inmates, 120 (27.91%) schools have only girls hostels with 5,397 inmates and 140 (32.56%) have both boys and girls hostels with 6,891 boys and 5,590 girls. The proportion of schools having hostels is largest in private-aided

schools (2.88%) with 5,984 boys and 7,025 girls and lowest in local-body schools (0.42%) with 1,923 boys and 1,278 girls.

Inmates in hostels attached to Middle Schools

In 4,434 (4.89%) middle schools having hostels 1,61,136 students are residing out of whom 1,18,494 (73.54%) are boys and 42,642 (26.46%) are girls. Of these middle schools 3,266 (73.66%) schools have only boys hostels with 78,135 inmates, 328 (7.40%) schools have only girls hostels with 18,974 inmates and 840 (18.94%) schools have both boys and girls hostels with 40,359 boys and 23,668 girls. Private-aided schools having hostels are in the largest proportion (14.13%) with 58,087 boys and 27,994 girls. Local-body schools having hostels are in the lowest proportion (1.30%) with 9,643 boys and 1,587 girls. Among the states, Nagaland, Orissa, Meghalaya and Manipur have hostel facilities in more than 10% middle schools (59.71%, 33.91%, 33.85% and 12.78% respectively) and the number of inmates are, 11,140 (7,148 boys and 3,992 girls), 25,883 (23,446 boys and 2,437 girls), 1,569 (1,133 boys and 436 girls) and 1,588 (1,106 boys and 482 girls) respectively.

Rural Middle Schools

In 3,906 (65.16%) rural middle schools 1,22,598 students are residing in hostels out of whom 95,319 (77.75%) are boys and 27,299 (22.25%) are girls. Of these middle schools 3,002 (76.86%) schools have hostels for boys with 64,061 inmates, 206 (5.27%) schools have hostels for girls with 10,041 inmates and 698 (17.87%) have hostels for both boys and girls with 31,281 boys and 17,238 girls. Private-aided schools having hostels are in the largest proportion (16.31%) with 45,230 boys and 15,773 girls and the local-body schools having hostels are in the lowest proportion (1.29%) with 8,118 boys and 1,291 girls.

Urban Middle Schools

In 528 (3.53%) urban middle schools 38,538 students are residing in hostels out of whom 23,175 (60.14%) are boys and 15,363 (39.86%) are girls. Of these urban middle schools 264 (50.00%) have hostels for boys with 14,074 inmates, 122 (23.11%) have hostel for girls with 8,933 inmates and 142 have both boys and girls hostels with 9,101 boys and 6,430 girls. The proportion of schools having hostels is largest (7.21%) in the case of private-aided schools with 12,857 boys and 12,221 girls and

lowest (1.35%) in local-body schools with 1,525 boys and 296 girls.

Inmates in Hostels attached to High/Secondary Schools

In 6,149 (21.40%) secondary schools having hostels 3,59,443 students are residing out of whom 2,71,732 (75.60%) are boys and 87,711 (24.40%) are girls. Of these secondary schools 4,835 (78.63%) are having hostels for boys with 2,20,049 inmates, 616 (10.02%) are having hostels for girls with 39,349 inmates and 698 (11.35%) are having hostels both for boys and girls with 51,683 boys and 48,362 girls. Private-aided schools having hostels are in the largest proportion (21.81%) with 1,85,699 boys and 57,349 girls. Government schools having hostels are in the lowest proportion (8.71%) with 31,820 boys and 7,665 girls. Among the states, Nagaland, Orissa, Meghalaya, Bihar, Tripura, Tamil Nadu and Andhra Pradesh have hostel facility in more than 20% schools (72.29%, 59.07%, 56.72%, 31.65%, 26.32%, 23.32% and 20.86% respectively) with 5,832, 68,031, 3,052, 32,056, 195, 67,797 and 40,688 inmates respectively.

Rural Secondary Schools

There are 4,737 (20.69%) rural secondary schools having hostels with 2,38,565 inmates of whom 2,02,081 (84.71%) are boys and 36,484 (15.29%) are girls. Of these secondary schools 3,980 (84.02%) schools have hostels for boys with 1,65,681 inmates, 254 (5.36%) schools have hostels for girls with 14,361 inmates and 503 (10.62%) schools have hostels for both boys and girls with 36,400 boys and 22,123 girls. Private-aided schools having hostels are in the largest proportion (25.80%) with 1,39,328 boys and 21,122 girls. Government schools having hostels are in the lowest proportion (8.56%) with 22,918 boys and 5,464 girls.

Urban Secondary Schools

In 1,412 (13.82%) urban secondary schools 1,20,878 students are residing in hostels of whom 69,651 (57.72%) are boys and 51,227 (42.38%) are girls. Of these urban secondary schools 855 (60.55%) schools have hostels for boys with 54,368 inmates, 362 (25.64%) schools have hostels for girls with 24,988 inmates and 195 (13.81%) schools have hostels for both boys and girls in which 15,283 boys and 26,239 girls are staying. Private-unaided-recognised schools having hostels are in the largest propo-

rtion (23.16%) with 21,151 inmates and government schools having hostels are in the lowest proportion (9.16%) with 11,703 inmates.

Inmates in Hostels attached to Higher Secondary Schools including Intermediate Junior Pre-University Colleges

There are 2,934 (21.40%) higher secondary schools with 1,12,643 inmates of whom 89,634 (79.57%) are boys and 23,009 (20.43%) are girls. Of these higher secondary schools 1,597 (78.52%) have hostels for boys with 78,070 inmates, 306 (15.04%) have hostels for girls with 19,110 inmates and 131 (6.44%) have hostels for both boys and girls with 11,554 boys and 3,899 girls. Private-aided schools having hostels are in the largest proportion (21.86%) with 40,933 boys and 15,705 girls. Local-body schools having hostels are in the lowest proportion (12.92%) with 1,323 boys and 292 girls. Among the states the proportion of schools having hostels is more than 30% in Tripura (64.29%), Kerala (52.50%), Orissa (50.00%), Assam (35.71) and Andhra Pradesh (30.77%) in which 1,145, 1,305, 325, 1,129 and 6,454 students respectively are staying.

Rural Higher Secondary Schools

In 1,212 (29.58%) rural higher secondary schools 50,377 students are staying of whom 44,546 (88.43%) are boys and 5,831 (11.57%) are girls. Of these higher secondary schools 1,074 (88.61%) have hostels for boys with 39,266 inmates, 68 (5.61%) have hostels for girls with 4,083 inmates and 70 (5.78%) have hostels for both boys and girls with 5,280 boys and 1,748 girls. The proportion of schools having hostel facilities is largest in private-aided schools (33.68%) where 33,960 students are staying and lowest in local-body schools where 841 students are staying.

Urban Higher Secondary Schools

In 822 (15.20%) urban higher secondary schools 62,266 students are residing of whom 45,088 (72.41%) are boys and 17,178 (27.59%) are girls. Of these urban secondary schools 523 (63.63%) have hostels for boys with 38,784 inmates, 238 (28.95%) have girls hostels with 15,027 inmates and 61 (7.42%) have hostels for both boys and girls with 6,304 boys and 2,151 girls. The proportion of schools having hostels is largest in private-unaided-recognised schools (21.31%) where 10,407 students are residing and lowest in local-body schools (10.53%) where 774 students are residing.
